

Community Guidelines

Last updated: 23 August 2026

FindingSites.com is a simple website directory. These Community Guidelines exist to keep the directory useful, safe and reasonably free from abuse.

1. Submit Legitimate Websites

Only submit websites and URLs that you are authorised to submit or have a legitimate reason to recommend.

Do not submit URLs designed primarily to mislead visitors about who operates the website.

2. No Malicious Websites

FindingSites does not permit listings that primarily facilitate:

- Malware.
- Phishing.
- Credential theft.
- Hacking or unauthorised access.
- Fraud.
- Scams.

- Distribution of malicious software.
- Other unlawful or harmful activity.

3. No Deliberate Deception

Do not use FindingSites to deliberately misrepresent a business, organisation, product, service or person.

Listings should not be created primarily to impersonate another organisation or deceive visitors.

4. No Abuse of the Directory

Do not attempt to manipulate, damage or disrupt FindingSites.

This includes excessive automated requests, attacks against the website, attempts to bypass technical restrictions and other behaviour intended to interfere with the service.

5. Keep Submissions Relevant

FindingSites is intended to catalogue websites.

Submissions should therefore point to an actual website or meaningful online destination rather than pages created solely for spam, automated content or abuse of the directory.

6. Removal Requests

FindingSites may independently discover and list websites.

If you own or operate a website that has been listed and you want it removed, email:

CentrumDisce@gmail.com

Please include the URL that you want removed.

We may request reasonable information to confirm that the request is genuine.

7. Enforcement

FindingSites may reject, edit, suspend or remove listings that violate these guidelines.

Depending on the circumstances, we may take action without prior notice.

We may also remove listings that are not technically in violation of a specific guideline where we reasonably believe removal is necessary to protect users, the directory or the operation of the website.

8. Reporting Problems

To report a malicious, fraudulent, illegal or otherwise inappropriate listing, email:

CentrumDisce@gmail.com

Please provide the URL and a brief explanation of the issue.

9. Updates

These guidelines may be updated as FindingSites develops.

The latest version will be published on FindingSites.com.
